Third Series* Library of Congress. Copyright Office,1977 **A Farewell to Alms** Gregory Clark,2008-12-29 Why are some parts of the world so rich and others so poor Why did the Industrial Revolution and the unprecedented economic growth that came with it occur in eighteenth century England and not at some other time or in some other place Why didn t industrialization make the whole world rich and why did it make large parts of

the world even poorer In *A Farewell to Alms* Gregory Clark tackles these profound questions and suggests a new and provocative way in which culture not exploitation geography or resources explains the wealth and the poverty of nations Countering the prevailing theory that the Industrial Revolution was sparked by the sudden development of stable political legal and economic institutions in seventeenth century Europe Clark shows that such institutions existed long before industrialization He argues instead that these institutions gradually led to deep cultural changes by encouraging people to abandon hunter gatherer instincts violence impatience and economy of effort and adopt economic habits hard work rationality and education The problem Clark says is that only societies that have long histories of settlement and security seem to develop the cultural characteristics and effective workforces that enable economic growth For the many societies that have not enjoyed long periods of stability industrialization has not been a blessing Clark also dissects the notion championed by Jared Diamond in *Guns Germs and Steel* that natural endowments such as geography account for differences in the wealth of nations A brilliant and sobering challenge to the idea that poor societies can be economically developed through outside intervention *A Farewell to Alms* may change the way global economic history is understood
