*Cultural Techniques* Bernhard Siegert, 2015-05-01 In a crucial shift within posthumanistic media studies Bernhard Siegert dissolves the concept of media into a network of operations that reproduce displace process and reflect the distinctions fundamental for a given culture Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics Rather Siegert seeks to relocate media and culture on a level where the distinctions between object and performance matter and form human and nonhuman sign and channel the symbolic and the real are still in the process of becoming The result is to turn ontology into a domain of all that is meant in German by the word Kultur Cultural techniques comprise not only self-referential symbolic practices like reading writing counting or image making The analysis of artifacts as cultural techniques emphasizes their ontological status as in between's shifting from first-order to second-order techniques from the technical to the artistic from object to sign from the natural to the cultural from the operational to the representational Cultural

Techniques ranges from seafaring drafting and eating to the production of the sign signal distinction in old and new media to the reproduction of anthropological difference to the study of trompe l'oeils grids registers and doors Throughout Siegart addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic Grounding posthumanist theory both historically and technically this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses

One Place after Another Miwon Kwon, 2004-02-27 A critical history of site specific art since the late 1960s Site specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality Throughout the 1970s and 1980s as site specific art intersected with land art process art performance art conceptual art installation art institutional critique community based art and public art its creators insisted on the inseparability of the work and its context In recent years however the presumption of unrepeatability and immobility encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces One Place after Another offers a critical history of site specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many permutations Informed by urban theory postmodernist criticism in art and architecture and debates concerning identity politics and the public sphere the book addresses the siting of art as more than an artistic problem It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism The book addresses the work of among others John Ahearn Mark Dion Andrea Fraser Donald Judd Renee Green Suzanne Lacy Inigo Manglano Ovalle Richard Serra Mierle Laderman Ukeles and Fred Wilson **The**

**Black Box Society** Frank Pasquale, 2015-01-05 Every day corporations are connecting the dots about our personal behavior silently scrutinizing clues left behind by our work habits and Internet use The data compiled and portraits created are incredibly detailed to the point of being invasive But who connects the dots about what firms are doing with this information The Black Box Society argues that we all need to be able to do so and to set limits on how big data affects our lives Hidden algorithms can make or ruin reputations decide the destiny of entrepreneurs or even devastate an entire economy Shrouded in secrecy and complexity decisions at major Silicon Valley and Wall Street firms were long assumed to be neutral and technical But leaks whistleblowers and legal disputes have shed new light on automated judgment Self serving and reckless behavior is surprisingly common and easy to hide in code protected by legal and real secrecy Even after billions of dollars of fines have been levied underfunded regulators may have only scratched the surface of this troubling behavior Frank Pasquale exposes how powerful interests abuse secrecy for profit and explains ways to rein them in Demanding transparency is only the first step An intelligible society would assure that key decisions of its most important firms are fair nondiscriminatory and

open to criticism Silicon Valley and Wall Street need to accept as much accountability as they impose on others

**Killing the Host** Michael Hudson, 2015 The financial sector has succeeded in depicting itself as part of the productive economy yet for centuries banking was recognized as being parasitic The essence of parasitism is not only to drain the host's nourishment but also to dull the host's brain so that it does not recognize that the parasite is there This is the illusion that much of Europe and the United States suffer under today The aim of this book is to pierce this illusion and replace junk economics with economics based on reality In *Killing the Host* Michael Hudson argues that financial crises will continue unless we radically transform our economic and political structures and reclaim the best ideas of classical economics Ominous yet clear-eyed and prophetic Hudson provides viable solutions to our economic problems at a time when politicians have shown themselves unable to understand our economy much less fix it
