Religion and Cultural Memory Jan Assmann, Rodney Livingstone, 2006 In ten brilliant essays Jan Assmann explores the connections between religion culture and memory Building on Maurice Halbwachs s idea that memory like language is a social phenomenon as well as an individual one he argues that memory has a cultural dimension too He develops a persuasive view of the life of the past in such surface phenomena as codes religious rites and festivals and canonical texts on the one hand and in the Freudian psychodrama of repressing and resurrecting the past on the other Whereas the current fad for oral history inevitably focuses on the actual memories of the last century or so Assmann presents a commanding view of culture extending over five thousand years He focuses on cultural memory from the Egyptians Babylonians and the Osage Indians down to recent controversies about memorializing the Holocaust in Germany and the role of memory in the current disputes between Israelis and Palestinians in the Middle East and between Protestants and Catholics in Northern Ireland

*Enlargement of the European Union* Allan F.

Tatham, 2009-01-26 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture, history and economics has supplanted the long dominant theme of widening and deepening, particularly since the Union's expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between widening and deepening and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity; judicial capacity and legal approximation in accession states; capacity of the EU to absorb new Member States and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations, e.g. Greece, Spain, Portugal, Malta and Cyprus, the still inconclusive negotiations with Turkey and the Western Balkan states, and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that absent further and major EU institutional reform, it will be difficult for an enlarging Union to continue to deliver the goods. A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe, this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

**Religious Dogmatics and the Evolution of Societies** Niklas Luhmann, 1984 This volume comprises an English translation of Niklas Luhmann's *Religiose Dogmatik und gesellschaftliche Funktion*. Chapter two of his 1977 *Funktion der Religion* which has been the subject of much discussion and controversy in Europe over the past 15 years. Peter Beyer also provides a 50 page introduction which treats some of the main concepts in Luhmann's abstract and difficult thought and also illustrates the way these concepts fit into his overall theory of society and religion.

*Secrets in Families and Family Therapy* Evan Imber-Black, 1993-01-01 Secret keeping is a seemingly unavoidable part of human interaction from governments to married couples. Unlike privacy which in the West is considered a healthy characteristic of the autonomous adult, secrets are often troublesome, creating distorted perceptions and strained relationships. Secrets moreover are complex. They differ in significance, a surprise party versus hidden incest, in the ways they shape family relationships, who knows what about whom, in their location between family members or between the family and society, and in their effects on individual functioning. Does the secret affect only one relationship or the overall way the individual responds to others? Because of this complexity, secrets are resistant to simple rules. Therapy must comprise more than opening up the secret or addressing only the context and not the content, or vice versa. Therapists are confronted with the difficult task of examining their own values regarding secrecy while at the

same time providing an effective therapeutic environment Practical issues of individual safety the meaning of the secret for the family the therapist s attitude towards secrets in general and the family s secret in particular all must be considered in order for treatment to be effective Here Imber Black and her contributors offer a vast array of approaches to helping families deal with secrets involving sexuality race violence parentage substance abuse illness and death The contributors explore the therapeutic social and political issues of secrets while always keeping families firmly in mind Through the many case examples they show us how families at first constricted by the need to maintain secrecy can gain strength through greater openness Part I sets the stage by defining secrets and their often shame bound origins Part II examines secrets throughout the family life cycle in couples between parents and children and with loss Part III shows how addictions such as drug abuse and eating disorders are often symptoms of unhealthy secrets In Part IV secrets of violence and abuse are discussed Part V offers a comprehensive look at social secrets involving sexism heterosexism and taboos Part VI discusses two very charged topics secret keeping involving race and racism and with AIDS Part VII concludes the book by offering a pattern for teaching and handling secrets in therapist training This diverse cast of talented therapists provides an elastic model for treating family secrets while compelling us to reevaluate our own thinking about secrets
