Albion's Seed David Hackett Fischer, 1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States from the earliest English settlements to our own time It is a history of American folkways as they have changed through time and it argues a thesis about the importance for the United States of having been British in its cultural origins While most people in the United States today have no British ancestors they have assimilated regional cultures which

were created by British colonists even while preserving ethnic identities at the same time In this sense nearly all Americans are Albion s Seed no matter what their ethnicity may be The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988 and still help to shape attitudes toward education government gender and violence on which differences between American regions are greater than between European nations

Wadhams Genealogy Mrs. Harriet Weeks (Wadhams) Stevens,1913

The Kallikak family Henry Herbert Goddard,1912 On September 15 1906 the Training School for Backward and Feeble minded Children at Vineland New Jersey opened a laboratory and a Department of Research for the study of feeble mindedness A beginning was made in studying the mental condition of the children who lived in the Institution with a view to determining the mental and physical peculiarities of the different grades and types to getting an accurate record of what deficiencies each child had and what he was capable of doing with the hope that in time these records could be correlated with the condition of the nervous system of the child if he should die while in the Institution and an autopsy should be allowed As soon as possible after the beginning of this work a definite start was made toward determining the cause of feeble mindedness After some preliminary work it was concluded that the only way to get the information needed was by sending trained workers to the homes of the children to learn by careful and wise questioning the facts that could be obtained It was a great surprise to us to discover so much mental defect in the families of so many of these children The results of the study of more than 300 families will soon be published showing that about 65 per cent of these children have the hereditary taint The present study of the Kallikak family is a genuine story of real people The name is of course fictitious as are all of the names throughout the story The results here presented come after two years of constant work investigating the conditions of this family To the scientific reader we would say that the data here presented are we believe accurate to a high degree It is true that we have made rather dogmatic statements and have drawn conclusions that do not seem scientifically warranted from the data We have done this because it seems necessary to make these statements and conclusions for the benefit of the lay reader and it was impossible to present in this book all of the data that would substantiate them We have as a matter of fact drawn upon the material which is soon to be presented in a larger book The reference to Mendelism is an illustration of what we mean Preface PsycINFO Database Record c 2005 APA all rights reserved
