

## threading the machine

Your sewing machine sews with two threads. The upper thread comes from the spool and is threaded through the eye of the needle. The lower thread comes from the bobbin, the small spool that you wind using the machine. It is best to wind the bobbin before threading the needle.

### THE BOBBIN THREAD

#### Winding the Bobbin

1. Raise the presser foot and turn hand wheel toward you until needle is at its highest position.
2. Loosen hand wheel knob by turning it toward you with the right hand while holding hand wheel with the left hand.
3. Open slide plate and lift out the bobbin.
4. Close slide plate.
