*Singing Archaeology* John Richardson, 1999-03-31 Illuminates the aesthetics of a major American composer Some Liked It Hot Kristin A. McGee, 2011-07-21 Women have been involved with jazz since its inception but all too often their achievements were not as well known as those of their male counterparts *Some Liked It Hot* looks at all girl bands and jazz women from the 1920s through the 1950s and how they fit into the nascent mass culture particularly film and television to uncover some of the historical motivations for excluding women from the now firmly established jazz canon This well illustrated book chronicles who appeared where and when in over 80 performances captured in both popular Hollywood productions and in relatively unknown films and television shows As McGee shows these performances reflected complex racial attitudes emerging in American culture during the first half of the twentieth century Her analysis illuminates the heavily mediated representational strategies that jazz women adopted highlighting the role that race played in constituting public performances of various styles of jazz from swing to hot and sweet The International Sweethearts of Rhythm Hazel Scott the Ingenues Peggy Lee and Paul Whiteman are just a few of the performers covered in the book which also includes a detailed filmography

**Singing Our Way to Victory** Regina M. Sweeney, 2023-09-05 Winner of the International Book Award from International Association for the Study of Popular Music 2003 The practice of singing and songwriting in France during the Great War provides an intriguing tool for the exploration of the French cultural politics of the epoch Responding to the dearth of cultural studies of the First World War Regina Sweeney s unique cross disciplinary study illuminates many of the hitherto unexplored corners of an era that many historians consider to exhibit a break with recognizable trends In early twentieth century Europe singing was considered a part of education integral to the formation of good citizens Singing was especially important to the French for whom it was historically associated with authenticity of feeling and purity of character and thereby with the very roots of French democracy it was particularly associated with the image of France as a victorious nation But as Sweeney shows different performances of the same patriotic song could carry vastly different meanings By

focusing on singing Sweeney is able to provide a more nuanced reading of French Great War cultures than ever before and to show that cultures previously held to be exclusive those of the home front and the Western front for example existed in dialectical tension and were themselves far from homogenous Wired for Sound Paul D. Greene, Thomas

Porcello, 2012-01-01 Winner of the Society for Ethnomusicology's Klaus Wachsmann Award 2006 Wired for Sound is the first anthology to address the role of sound engineering technologies in the shaping of contemporary global music. Wired sound is at the basis of digital audio editing, multi-track recording and other studio practices that have powerfully impacted the world's music. Distinctions between musicians and engineers increasingly blur, making it possible for people around the globe to imagine new sounds and construct new musical aesthetics. This collection of 11 essays employs primarily ethnographical but also historical and psychological approaches to examine a range of new technology-intensive musics and musical practices such as fusions of Indian film song rhythms, heavy metal and gamelan in Jakarta, urban Nepali pop which juxtaposes heavy metal, Tibetan Buddhist ritual chant, rap and Himalayan folksongs, collaborations between Australian aboriginals and sound engineers, the production of heaviness in heavy metal music and the production of the Austin sound. This anthology is a must reading for anyone interested in the global character of contemporary music technology. CONTRIBUTORS: Harris M. Berger, Beverly Diamond, Cornelia Fales, Ingemar Grandin, Louise Meintjes, Frederick J. Moehn, Karl Neunfeldt, Timothy D. Taylor, Jeremy Wallach. Presence and Pleasure Anne Danielsen, 2024-08-06 Winner of the 2007 Irving Lowens Book Award from the Society for American Music, Winner of IASPM's 2007 International Book Award. In this exploration of the funk groove and its unique sounds, author Anne Danielsen takes an in-depth look at this under-explored genre. Danielsen concentrates on the golden age of funk in the late 1960s and the 1970s, focusing on two of the era's artists who made a substantial impact on the landscape of popular music: James Brown and George Clinton's Parliament. Aiming to understand funk not only as objectified musical meaning but also as lived experience, she begins with the musical events themselves and draws on her experiences as both a fan and a scholar to capture how their particular organization creates the funk listener's pleasure. Danielsen further examines issues surrounding race in the construction and consumption of this music, focusing her study with how white listeners responded to funk in the 1970s and arguing that African American music has remained a means of catharsis and of dealing with pleasures of the body. Funk's crossover to international success among listeners of pop and rock music affected both the music itself and audiences' understanding of it. Presence and Pleasure shows us how. *Identity and Everyday Life* Harris M. Berger, Giovanna P. Del Negro, 2004-04-29 A critical examination of core issues in social and cultural theory.

**Music and Technoculture** René T. A. Lysloff, Leslie C. Gay, Jr., 2013-08-15 Moving from web to field from Victorian parlor to 21st century mall, the 15 essays gathered here yield new insights regarding the intersection of local culture, musical creativity and technological possibilities. Inspired by the concept of technoculture, the authors locate technology squarely in the middle of expressive culture; they are concerned with how technology culturally informs and infuses aspects of everyday

life and musical experience and they argue that this merger does not necessarily result in a cultural grayout but instead often produces exciting new possibilities In this collection we find evidence of musical practices and ways of knowing music that are informed or even significantly transformed by new technologies yet remain profoundly local in style and meaning

**Making Beats** Joseph G. Schloss, 2014-11-20 Winner of IASPM's 2005 International Book Award Based on ten years of research among hip hop producers Making Beats was the first work of scholarship to explore the goals methods and values of a surprisingly insular community Focusing on a variety of subjects from hip hop artists pedagogical methods to the Afrodiasporic roots of the sampling process to the social significance of digging for rare records Joseph G Schloss examines the way hip hop artists have managed to create a form of expression that reflects their creative aspirations moral beliefs political values and cultural realities This second edition of the book includes a new foreword by Jeff Chang and a new afterword by the author

**Music of the Common Tongue** Christopher Small, 2012-01-01 In clear and elegant prose Music of the Common Tongue first published in 1987 argues that by any reasonable reckoning of the function of music in human life the African American tradition that which stems from the collision between African and European ways of doing music which occurred in the Americas and the Caribbean during and after slavery is the major western music of the twentieth century In showing why this is so the author presents not only an account of African American music from its origins but also a more general consideration of the nature of the music act and of its function in human life The two streams of discussion occupy alternate chapters so that each casts light on the other The author offers also an answer to what the Musical Times called the seldom posed though glaringly obtrusive question why is it that the music of an alienated oppressed often persecuted black minority should have made so powerful an impact on the entire industrialized world whatever the color of its skin or economic status

Popular Music in Theory Keith Negus, 1997-02-28 A lively contribution to the debates that are central to popular music studies

**The Cultural Work** Corinna Campbell, 2020-06-02 How do people in an intensely multicultural city live alongside one another while maintaining clear boundaries This question is at the core of The Cultural Work which illustrates how the Maroons descendants of escaped slaves of Suriname and French Guiana on the northern coast of South America have used culture representational performance to sustain their communities within Paramaribo the capital Focusing on three collectives known locally as cultural groups which specialize in the music and dance traditions of the Maroons it marks a vital contribution to knowledge about the cultural map of the African diaspora in South America Latin America and the Caribbean

*Dissonant Landscapes* Tore Størvold,2023-06-06 During the past three decades Iceland has attained a strong presence in the world through its musical culture with images of the nation being packaged and shipped out in melodies harmonies and rhythms What Iceland means for people both at home and abroad is conditioned by music and its ability to animate notions of nature and nationality In six chapters that range from discussions of indie rock ballads to Nordic noir television music *Dissonant Landscapes* describes the capacity of musical expression to transform ideas about nature and nationality on the northern edges of Europe     **The Ashgate Research Companion to Minimalist and Postminimalist Music** Keith

Potter,Kyle Gann,2016-03-23 In recent years the music of minimalist composers such as La Monte Young Terry Riley Steve Reich and Philip Glass has increasingly become the subject of important musicological reflection research and debate Scholars have also been turning their attention to the work of lesser known contemporaries such as Phill Niblock and Eliane Radigue or to second and third generation minimalists such as John Adams Louis Andriessen Michael Nyman and William Duckworth whose range of styles may undermine any sense of shared aesthetic approach but whose output is still to a large extent informed by the innovative work of their minimalist predecessors Attempts have also been made by a number of academics to contextualise the work of composers who have moved in parallel with these developments while remaining resolutely outside its immediate environment including such diverse figures as Karel Goeyvaerts Robert Ashley Arvo Pärt and Brian Eno Theory has reflected practice in many respects with the multimedia works of Reich and Glass encouraging interdisciplinary approaches associations and interconnections Minimalism's role in culture and society has also become the subject of recent interest and debate complementing existing scholarship which addressed the subject from the perspective of historiography analysis aesthetics and philosophy *The Ashgate Research Companion to Minimalist and Postminimalist Music* provides an authoritative overview of established research in this area while also offering new and innovative approaches to the subject     *"You Better Work!"* Kai Fikentscher,2000-08-18 The first in depth study of underground dance

music     **Musicking** Christopher Small,2012-01-01 Extending the inquiry of his early groundbreaking books Christopher Small strikes at the heart of traditional studies of Western music by asserting that music is not a thing but rather an activity In this new book Small outlines a theory of what he terms musicking a verb that encompasses all musical activity from composing to performing to listening to a Walkman to singing in the shower Using Gregory Bateson's philosophy of mind and a Geertzian thick description of a typical concert in a typical symphony hall Small demonstrates how musicking forms a ritual through which all the participants explore and celebrate the relationships that constitute their social identity This engaging and deftly written trip through the concert hall will have readers rethinking every aspect of their musical worlds     *An Eye for Music* John Richardson,2012-01-26 In *An Eye for Music* John Richardson navigates key areas of current thought from music theory to film theory to cultural theory to explore what it means that the experience of music is now cinematic spatial
