Social Media in Trinidad Jolynna Sinanan, 2017-11-21 Drawing on 15 months of ethnographic research in one of the most under developed regions in the Caribbean island of Trinidad this book describes the uses and consequences of social media for its residents Jolynna Sinanan argues that this semi urban town is a place in between somewhere city dwellers look down on and villagers look up to The complex identity of the town is expressed through uses of social media with significant results for understanding social media more generally Not elevating oneself above others is one of the core values of the town and social media becomes a tool for social visibility that is the process of how social norms come to be and how they are negotiated Carnival logic and high impact visuality is pervasive in uses of social media even if Carnival is not embraced by all Trinidadians in the town and results in presenting oneself and association with different groups in varying ways The study also has surprising results in how residents are explicitly non activist and align themselves with everyday values of maintaining good relationships in a small town rather than espousing more worldly or cosmopolitan values

Transgressive Devotion Natalie Wigg-Stevenson , 2021-02-28 Academic theology is in need of a new genre In Transgressive Devotion Natalie Wigg Stevenson articulates a theological vision of that genre as performance art She argues that theology done as performance art stops trying to describe who God is and starts trying to make God appear Recognising that the act of studying theology or practicing ministry is always a performance where the boundaries between what we see feel experience and learn are not just blurred but potentially invisible Wigg Stevenson brings together ethnographic theological fieldwork historical and contemporary Christian theological traditions and performance artworks themselves A daring vision of theology which will energise anybody feeling boxed in by the discipline Transgressive Devotion blurs borders between orthodoxy heterodoxy and heresy to reveal how the very act of doing theology makes God and humanity vulnerable to each other This is theology which is a liturgy of Divine incantation In other words this is theology which is also prayer

After Method John Law, 2004-08-12 John Law argues that methods don t just describe social realities but are also involved in creating them The implications of this argument are highly significant If this is the case methods are always political and it raises the question of what kinds of social realities we want to create Most current methods look for clarity

and precision It is usually said that only poor research produces messy findings and the idea that things in the world might be fluid elusive or multiple is unthinkable Law s startling argument is that this is wrong and it is time for a new approach Many realities he says are vague and ephemeral If methods want to know and help to shape the world then they need to reinvent themselves and their politics to deal with mess That is the challenge Nothing less will do **Sensuous**

Scholarship Paul Stoller,2010-11-24 Among the Songhay of Mali and Niger who consider the stomach the seat of personality learning is understood not in terms of mental activity but in bodily terms Songhay bards study history by eating the words of the ancestors and sorcerers learn their art by ingesting particular substances by testing their flesh with knives by mastering pain and illness In *Sensuous Scholarship* Paul Stoller challenges contemporary social theorists and cultural critics who using the notion of embodiment to critique Eurocentric and phallogocentric predispositions in scholarly thought consider the body primarily as a text that can be read and analyzed Stoller argues that this attitude is in itself Eurocentric and is particularly inappropriate for anthropologists who often work in societies in which the notion of text and textual interpretation is foreign Throughout *Sensuous Scholarship* Stoller argues for the importance of understanding the sensuous epistemologies of many non Western societies so that we can better understand the societies themselves and what their epistemologies have to teach us about human experience in general *Capitalism* Nancy Fraser,Rahel Jaeggi,2018-06-28 In this important new book

Nancy Fraser and Rahel Jaeggi take a fresh look at the big questions surrounding the peculiar social form known as capitalism upending many of our commonly held assumptions about what capitalism is and how to subject it to critique They show how throughout its history various regimes of capitalism have relied on a series of institutional separations between economy and polity production and social reproduction and human and non human nature periodically readjusting the boundaries between these domains in response to crises and upheavals They consider how these boundary struggles offer a key to understanding capitalism s contradictions and the multiple forms of conflict to which it gives rise What emerges is a renewed crisis critique of capitalism which puts our present conjuncture into broader perspective along with sharp diagnoses of the recent resurgence of right wing populism and what would be required of a viable Left alternative This major new book by two leading critical theorists will be of great interest to anyone concerned with the nature and future of capitalism and with the key questions of progressive politics today Introducing Urban Anthropology Rivke Jaffe,Anouk de Koning,2015-10-30 This book provides an up to date introduction to the important and growing field of urban anthropology This is an increasingly critical area of study as more than half of the world s population now lives in cities and

anthropological research is increasingly done in an urban context Exploring contemporary anthropological approaches to the urban the authors consider How can we define urban anthropology What are the main themes of twenty first century urban anthropological research What are the possible future directions in the field The chapters cover topics such as urban mobilities place making and public space production and consumption politics and governance These are illustrated by lively

case studies drawn from a diverse range of urban settings in the global North and South Accessible yet theoretically incisive *Introducing Urban Anthropology* will be a valuable resource for anthropology students as well as of interest to those working in urban studies and related disciplines such as sociology and geography

Visualising Facebook

Daniel Miller, Jolynna Sinanan, 2017-03-07 Since the growth of social media human communication has become much more visual This book presents a scholarly analysis of the images people post on a regular basis to Facebook By including hundreds of examples readers can see for themselves the differences between postings from a village north of London and those from a small town in Trinidad Why do women respond so differently to becoming a mother in England from the way they do in Trinidad How are values such as carnival and suburbia expressed visually Based on an examination of over 20 000 images the authors argue that phenomena such as selfies and memes must be analysed in their local context The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations and explores the changing role of photography from that of recording and representation to that of communication where an image not only documents an experience but also enhances it making the moment itself more exciting
