Angel launched a unique pioneering study tracing the origin growth and basic features of the international law of youth rights. It consisted of both source documents and commentary on the historical trends to elaborate and codify international instruments and standards in this field as well as action taken by governmental intergovernmental and non governmental organizations to promote and protect youth rights. It concluded with a call for a new international instrument and monitoring machinery to better promote and protect the rights of youth on a global basis. The aim of the current revised updated and expanded edition of this ground breaking work is twofold. First to preserve and update the landmark historical research undertaken by William Angel and present it to today's audience. Second to introduce up to date analysis of the state of the International Law of Youth Rights and to provide an easy to use compilation of sources of law for researchers and practitioners active in this field. This important collection will provide a roadmap for readers to finding the various sources of the International Law of Youth Rights and a reference point for the most relevant legal documents in force. It aims to spark further legal political and sociological research in the academic field as well as support even stronger advocacy actions to further the rights of young people. Two volume set.

Sources of International Law V.D. Degan, 2024-01-15. Many different and even opposite meanings are ascribed to the term sources of international law. The author of this work goes back to the meaning of the term source in general, springs or wells, and analyses in detail the various sources of international law. He first explains the sources of general and then those of particular international law. He starts with general principles of law which is followed by common features of customary process of whatsoever kind and then by general and by particular customary law. Custom will be followed by unilateral acts of States and with opposable situations in international law which are closely linked with this kind of sources of international law. The explanation ends with treaties in regard to which there are the least doctrinal controversies. The explanation cannot be quite homogeneous. There are still deep doctrinal misunderstandings in respect to general principles of law and of unilateral acts of States. The author therefore offers a critical analysis of representative views of other authors and tries to reach solutions to problems presented. He also gives a systematic explanation of recent pronouncements of international courts and tribunals with regard to customary law and he examines the specific solutions prescribed in the 1969 Vienna Convention on the Law of Treaties.
